UI / UX

Game Developer

Story Writer

Hello!

My Name is Azza

A game artist who also builds games in Unity. I focus on stylized visuals and clean UI/UX, and I've worked on casual arcade and mini-game experiences.

I'm also active in the Surabaya game dev community including helping organize Global Game Jam Surabaya since 2023.

Webtoon Series

Summary

A webtoon story that tells the effect of bullying in school life, where the Naomi -the main character- suffers from memory loss and tries to uncover what happened in their past.

Project Description

This project was my first project in creative industry. I worked as a comic assistant by developing the story and turn it to a script into clear storyboards and supporting the production process through base coloring. This project earning over 22 million reads on Webtoon.

Through this role, I learn a lot about how to make a great storytelling, and also learned how to collaborate in a production team. My biggest challenge in this project is to stay consistent under intense deadlines, and i managed to solve that by being well

Group Project

- scene sekolah, di kelas jam istirahat
  - **done!** -denise selesai moles kuku navy pake kutek
  - **mami bakal marah deh kalau aku pake ginian** -navy ngeliatin tangannya
  - **yaudah biarin aja, toh mamimu ga paham fashion, percaya aja ini cantik kok!** -Denise
  - ***cantik..? aku..?*** *-navy ngebatin sambil tersipu senyum*
- *denise ngelirik navy yang besar kepala abis digituin, dia pengen mancing navy lebih besar kepala*

Mie Ayam Simulator

Summary

An android simulator game to become the most successful mie ayam seller in the town.

Group Project

Project Description

This is my first published game as a 2D artist in game development and i here i learn a lot about the fundamental of game development.This game was submitted to the Gameseed competition. Through the program, we received incubation support that taught me how to design a strong FTUE and helped us develop the game further until it reached around 80K++ organic users.

As this is my introduction to the industry, I've encountered various bugs, and crashed. Still, the game managed to be released and I'm grateful to learn publishing to game store along the way.

Bos Gabut

Group Project

Summary

An android quiz game that give real life rewards and become the king of quiz!

Project Description

This is project as an UI/UX designer employee. Here, i redesign the old UI & UX from the last version and implement the lesson from my last project to improve the FTUE of the game. I also learn to design the website and improve the store listing in Play Store.

The result from implementing the new FTUE is making user retention is growing and the game is get more than 10K+ user after 2 month.

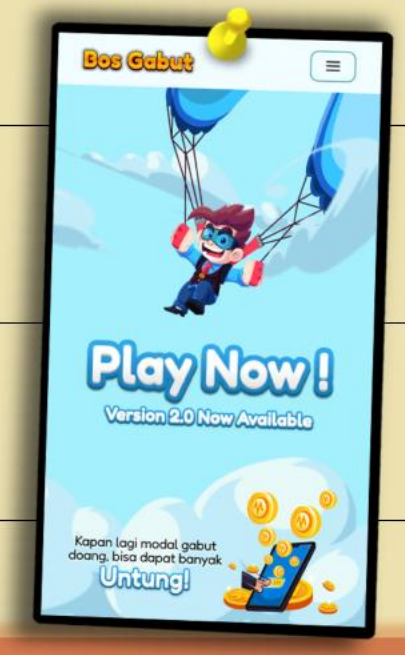
Bos Gabut 1.0

Bos Gabut 2.0



Zombie Shooter

Summary

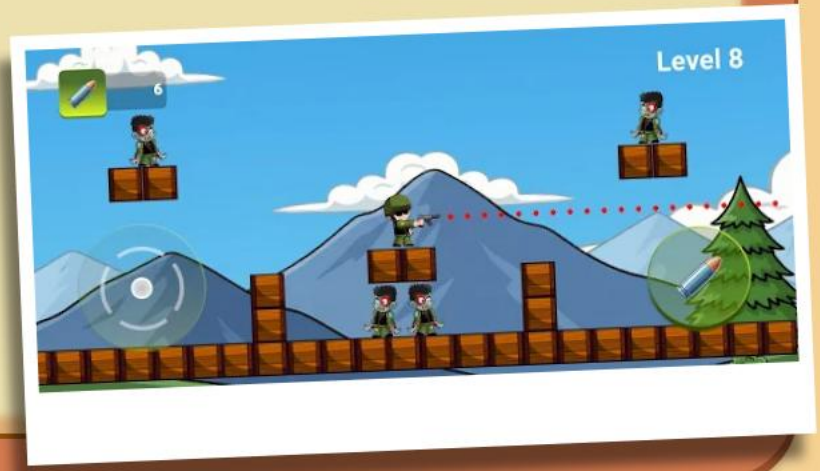
A simple phisyc-based aim game where you shoot zombies!

Group Project

Project Description

This was my first project as a game developer where I handled everything end-to-end, including game design, UI design, and programming. It was challenging, but it gave me a lot of new experience in coding, especially to implement SOLID principle in this project.

In this project, I learned how to build a level database, create UI animations in Unity, integrate AdMob ads, and export the game for Android and HTML web. it really hard at first, but thankfully i could adapt with all this new experience.



Portal Game

Summary

A web based mini game that could be played in anywhere.

Project Description

After creating some games, i managed to deploy it to Playstore and upload it to our own website.

My contribution in this project as Project Leader and ul/UX designer. Some challenges we faced in this project were our lack of experience exporting the game to HTML, so the visuals sometimes looked messy. But we managed to fix it by making the game fullscreen with a fixed, predefined aspect ratio.

This project is still in development.
